ECA16 –ExpressCard Adapter
Universal PCMCIA Cradle for ExpressCards

Features

**Universal Design –
supports all ExpressCards
(USB Interface) including
3G Datacards, WiMax and
Memory cards**

**Works in PCMCIA card
slots on legacy platforms**

**Low profile – ExpressCard
is inside the PC card slot**

Plug and Play installation

Low Power consumption

**Supplies 20% more power
to the ExpressCard than
equivalent CardBus
products**

The ECA16 is a simple solution to plug ExpressCards into legacy laptop and desktop machines via the PC Card slot.

A 16-bit design using Elan's own silicon maximizes the power available to the ExpressCard to prevent performance issues due to power dips.

The adapter is a low cost solution for OEMs wishing to offer it alongside their own ExpressCard designs and is also of interest to end users without ExpressCard slots.

Technical Features

Supported O/S : Windows 2000/XP/Vista (WHQL approval pending), LINUX, Mac OSX

Power provided to ExpressCard : typical 1.25A @ 3.3V. Power available on both ExpressCard rails (3.3V and 1.5V) if required

OEM custom labeling available if required

All specifications are subject to change without notice
